WARM & LASTING

Usage and applications

The cast iron fireplace of Chauffagekar Industrial Company is used as a home heating system. This system transmits heating in radiation and convection form. This fireplace can be used as a closed chamber or without a chamber. If used as an open chamber, due to the hot body of the fireplace, the safety of children and uninformed people should be taken care of. The chimney of the fireplace should be installed in its upper part according to the specifications.

Fuels

This Fireplace are designed to be used with solid fuels such as Wood, Coal and etc.

Material

Our Products are manufactured to the highest standards of cast iron and the finishing processes are carried out by highly trained craftsmen.
